

# 5<sup>TH</sup> REIS TECHNOLOGY DAYS

SEPT.30<sup>TH</sup>-OCT.1<sup>ST</sup>, 2009

## FOUNDRY AUTOMATION

REIS HEADQUARTERS

Dear Sir or Madam,

For the 5<sup>th</sup> time now REIS technology days are taking place in Obernburg-Germany ; these days will be a practical workshop. The following subjects will be focused this year:

- Foundry automation for Diecasting and gravity Diecasting applications
- New machine guideline and VDMA-interface standardization
- Innovative technologies for processing of unfinished castings
- Energy efficiency and saving possibilities in foundries

In the scope of talks and practical demonstrations we will enable you to get comprehensive information on these subjects. For this purpose we invited leading companies such as Wollin, Weber-Systemtechnik, Pyrotec, AEP Zimmer, Buehler, Amtru, Wostor and the foundry association VDMA. Those will discuss in detail the status of their technologies and the combination of complete automated casting cells. The whole will be performed in four application halls by practical demonstration of automation solutions close to reality.

For detailed program schedules please don't hesitate to contact us. We planned the workshop such that you can either begin in the morning at 09.00 am or in the afternoon at 1.15 pm. On September 30<sup>th</sup> you are cordially invited to visit the foundry evening for exchange of views in the nearby restaurant for events, called "Muellerei".

We would be pleased to provide detailed information and also to assist you in hotel booking and transfer.

Please take this opportunity to get information!

We are looking forward to receiving your call and to have informative discussions.

Kind regards,

REIS ROBOTICS USA, INC.
