Who Determines What is an Essential Business?

- U.S. law gives cities, counties, and states the power to manage their own emergency preparedness
- All determinations as of right now are made by counties, states
- Non-binding list of essential employees came from federal government (Department of Homeland Security Cybersecurity & Infrastructure Security Agency) on 3/19
- 30+ states have begun to voluntarily use federal definition
- However, some states go further
- In most states, if deemed essential, employees must report to work
Essential Critical Infrastructure Definition

Under 50 Workers: Company Can Self-Exempt

• The provision of paid sick leave or expanded family and medical leave would result in the small business’s expenses and financial obligations exceeding available business revenues and cause the small business to cease operating at a minimal capacity;

• The absence of the employee or employees requesting paid sick leave or expanded family and medical leave would entail a substantial risk to the financial health or operational capabilities of the small business because of their specialized skills, knowledge of the business, or responsibilities; or

• There are not sufficient workers who are able, willing, and qualified, and who will be available at the time and place needed, to perform the labor or services provided by the employee or employees requesting paid sick leave or expanded family and medical leave, and these labor or services are needed for the small business to operate at a minimal capacity.
Employee must provide written request for leave to employer
- The employee’s name; date or dates for which leave is requested;
- A statement of the COVID-19 related reason the employee is requesting leave and written support for such reason, and that the employee is unable to work, including telework

If leave based on quarantine order or self-quarantine advice, employee includes:
- The name of the governmental entity ordering quarantine or the name of the health care professional advising self-quarantine, and, if the person subject to quarantine or advised to self-quarantine is not the employee, that person’s name and relation to the employee.

If leave based on school closing or child care unavailability, employee includes:
- Name, age of the child/children; name of school closed or place of care that is unavailable, statement that no other person will be providing care during the period for which the employee is receiving family medical leave and, inability to telework because of a need to provide care for a child older than fourteen during daylight hours, a statement that special circumstances exist requiring the employee to provide care.
EPSL/EFMLA Tax Credit – Documentation

• Documentation to show how the employer determined the amount of qualified sick and family leave wages paid to employees that are eligible for the credit, including records of work, telework and qualified sick leave and qualified family leave.

• Documentation to show how the employer determined the amount of qualified health plan expenses that the employer allocated to wages. See FAQ 31 (“Determining the Amount of Allocable Qualified Health Plan Expenses”) for methods to compute this allocation.

• Copies of any completed Forms 7200, Advance of Employer Credits Due To COVID-19, that the employer submitted to the IRS.

• Copies of the completed Forms 941, Employer’s Quarterly Federal Tax Return, that the employer submitted to the IRS (or, for employers that use third party payers to meet their employment tax obligations, records of information provided to the third party payer regarding the employer’s entitlement to the credit claimed on Form 941).
