### **NADCA to Host the Die Casting Congress & Tabletop in Columbus, OH**

Arlington Heights, IL - The North American Die Casting Association (NADCA) will host the 2016 Die Casting Congress & Tabletop, September 26-28, 2016, at the Greater Columbus Convention Center in Columbus, OH.

“By all accounts, this show was one of the best we’ve been involved with since participating. The quantity and quality of attendees and sessions were tremendous, and really generated great excitement and enthusiasm for the future of the die casting industry in the U.S. and around the world,” said Terry Moon, President & CEO, Versevo Inc, about his experience at last year’s show.

This event will feature three days of Congress sessions, technical and management presentations that will be given by experts from around the world. These presentations will expose metalcasters to the latest technology, ongoing research and successful management tools that will assist companies in enhancing their competitiveness.

Hal Gerber, Executive Director - Market Development, Shiloh Industries, said of NADCA’s previous show, “The Congress was well attended and full of energy. The venue and the presentation floor presented many opportunities for business conversations with OEM’s and vendors. The technical papers were excellent, full of grounded research, development and market application. The technical sessions were so well-attended that engineers were standing to listen to the new ideas and practices proposed. The show was a great one.”

Over a thousand attendees are expected to attend and will have the option to participate in Congress sessions, visit over 100 exhibitors and view the winners of the International Die Casting Design Competition.

The Die Casting Congress & Tabletop is an exclusive event to the die casting industry and its suppliers. For more information on the Die Casting Congress & Tabletop, please visit [www.diecasting.org/congress](http://www.diecasting.org/congress).
