The North American Die Casting Association is pleased to recognize Corporate Members with operations which have a strong focus on their employee's safety and well-being. NADCA's Safety Award Program was developed to honor Corporate Members that both exceed and meet the average U.S. national safety standards for all manufacturing in a given year. Companies that have maintained a safety record during 2018 with 0 lost days/transfers/restrictions are awarded with a "Perfect" award. Companies with DART (days away, restricted or transferred) records equal to, or less than 2.1%, the national average for all manufacturing industries in 2017, are recognized with an "Outstanding" award. The NADCA Progress Award for Safety Improvements recognizes companies with a recorded safety DART improvement of 25% or more as compared to the prior year. NADCA is pleased to recognize all of these award-winning companies.

Attention Corporate Members:

Take advantage of being a NADCA Corporate Member! Have your new product highlighted in Die Casting Engineer.

As a NADCA Corporate Member, you are allowed one complimentary product listing per issue of DCE. This includes a short write-up and high-resolution photo. To learn how to put your company’s new products, services and solutions in print contact Athena Callett at catlett@diecasting.org.

NADCA Individual Members may submit one free listing per year, and for nonmembers there is a small fee.
